There is something wrong with that word. It isn't put together right. If you spell it backwards it will form the word "Columbia," the name of our telephones. It's just the same way with many of the telephones on the market. They have all the parts, but they are not put together right.

That's where they differ from ours.

When you buy a "Columbia" you get an instrument that is right all the way through.

You don't get a piano finish on the outside and a scrap heap on the inside.

Every part is built for efficient service under all conditions and it stays that way.

We'd like to have you write us for prices, we are sure you will never regret so doing.

We will buy your old telephones and switchboards.
