Marked "The Lockwood New Brunswick, N.J. J Tice Mfr"

# The Lockwood Transmitter

Is protected by letters patent No. 528640 and No. 557588, issued Nov. 6, 1894, and April 7, 1896, respectively.

The electrodes have "A variable air space" between them, and the adjustment is obtained by tension instead of pressure. The Lockwood is positively the only Transmitter on the market having no contact BETWEEN electrodes, consequently parties liable to infringement suits and promoters of long-distance systems will find it to be the only telephone that will satisfy the fears of their subscribers. The Transmitter can be placed upon any instrument now in use, and an exchange of Transmitters is easily effected.

Address:

**The Lockwood Long Distance Telephone & Telegraph Company of America,**

JOSIAH TICE, Mgr. No. 80 Albany St., New Brunswick, N. J.

## "THE LOCKWOOD"

THE ONLY LONG DISTANCE TELEPHONE,  
and the best exchange phone in the Market.
